NOVATUB®

El nivel de calidad técnica es la constante que mejor define la vocación de NOVATUB de fabricar solamente productos totalmente garantizados y competitivos.

Nuestra amplia gama de conductos abarca **circulares**, **circulares con junta de goma**, **rectangulares**, **ovales**, **doble tubo aislados**, **Shunt**, **lisos**, **con pestaña**, **flexibles** ... todos ellos con su completo conjunto de **acoplamientos** y **accesorios**. Las chimeneas modulares de doble pared en acero inoxidable completan nuestro programa.

Certificados CE • Homologaciones

Los requerimientos y especificaciones técnicas que marcan las diferentes normativas están sobradamente cubiertas por todos nuestros fabricados:

- **normativa CTE**, exigencias que determina el **Código Técnico de la Edificación** para el sistema general de ventilación en viviendas.
- **certificados de calidad CE**, homologaciones según normas y legislación **CE** para extracciones y conducciones de ventilación y climatización:
 - **conducto circular E600 120(ho) 500 mono**
 - **conducto rectangular M30 E600 120(ho) 500 mono**
 - **conducto rectangular M20 E600 120(ho) 500 mono**
 - **conducto rectangular M20 E300 60(ho) 500 mono**

NOVATUB facilita los certificados de homologación de nuestros conductos para acompañar la documentación de las obras correspondientes.

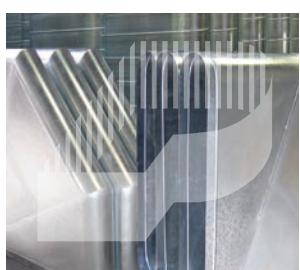

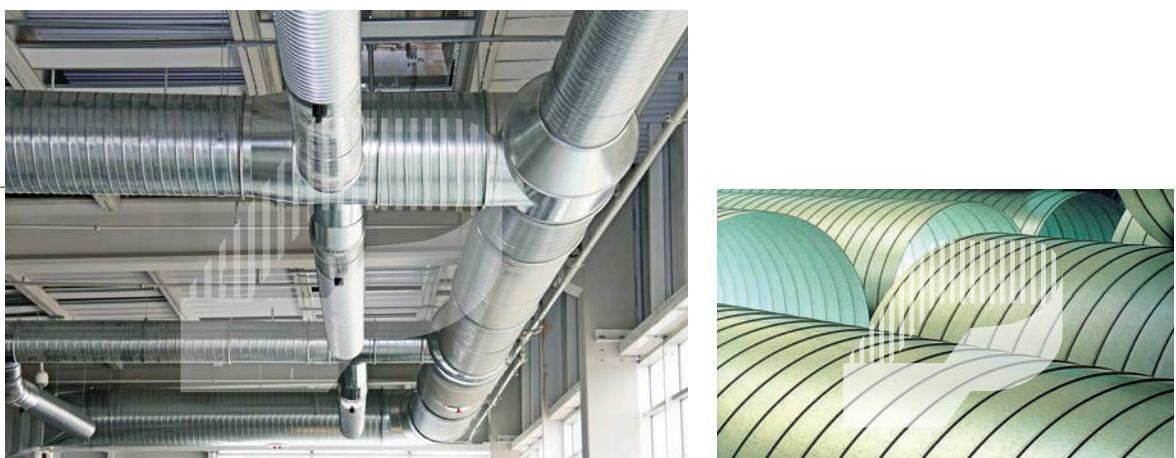

Nuestra efectividad se basa en una estructura dinámica y experimentada, con avanzados sistemas y gran capacidad de producción, acompañado de un riguroso control de calidad que satisface a las más exigentes homologaciones. Todo ello repercute positivamente en unas instalaciones más ágiles y más fiables.

Además de disponer del conjunto más completo de conductos y accesorios para ventilación y climatización, estándar o a medida, el departamento técnico asesora y desarrolla sobre cualquier demanda específica.

Conecte con NOVATUB.

Nuestro compromiso abarca desde la solicitud inicial hasta el cumplimiento del pedido.

CTE

CÓDIGO TÉCNICO
DE LA EDIFICACIÓN

eficacia total

el conjunto más completo
de conductos y accesorios
para ventilación y
climatización

Ventilación mecánica de viviendas

El **Código Técnico de la Edificación (CTE)** exige que las viviendas dispongan de un sistema general de ventilación para garantizar su salubridad y determina unos requisitos mínimos a cumplir por todas las viviendas.

Debe existir una circulación permanente del aire en la vivienda, y la normativa establece que éste se capta en las zonas secas (comedor y habitaciones) y sea evacuado por las zonas húmedas (cocina y baños).

Para asegurar la renovación permanente del caudal de aire se dispone de sistemas de **Ventilación mecánica** -la renovación se produce a través de los elementos mecánicos de la vivienda- y de **Ventilación híbrida** -elementos electromecánicos que ayudan al tiro natural cuando las condiciones ambientales lo requieren-.

Como el aire recorre toda la vivienda, para el cálculo no deben sumarse todos los caudales sino que se usará el valor más alto tanto de entrada como de salida.

El CTE también determina que la ventilación de las cocinas debe ser independiente de la ventilación general, a través de un sistema adicional y específico para este uso.

Desde siempre, el compromiso de NOVATUB con la calidad técnica es total.

Ello repercute en unas instalaciones más ágiles y fiables. Y por descontado, los requerimientos y especificaciones técnicas que fija el CTE son debidamente cubiertos por todo el conjunto de fabricados de este extenso catálogo.

Desde siempre, solucionando los requerimientos de los especialistas en ventilación y climatización.

| Caudales de ventilación mínimos exigidos, en l/s | | | |
|--|--------------|-------------------------|------------------|
| | Por ocupante | Por m ² útil | Otros parámetros |
| Dormitorios | 5 | | |
| Salas de estar y comedores | 3 | | |
| Aseos y cuartos de baño | | 15 x local | |
| Cocinas | | 2 (1) | 50 x local (2) |
| Trasteros y sus zonas comunes | | 0,7 | |
| Aparcamientos y garajes | | | 120 x plaza |
| Almacenes de residuos | | 10 | |

(1) En las cocinas con sistema de cocción por combustión o dotadas de calderas no estancas, este caudal se incrementa en 8 l/s.

(2) Este es el caudal correspondiente a la ventilación adicional específica de la cocina.

Ejemplo de valores de aplicación

- Una vivienda con
- 3 dormitorios (2 dobles)
 - comedor
 - cocina de 6 m² y cocina de gas
 - 2 baños

| Captación a través de zonas secas | | |
|-----------------------------------|--------------------|------------------------|
| Dormitorios | | |
| 2 dobles | 5 l/s x 4 = 20 l/s | = 72 m ³ /h |
| 1 individual | 5 l/s | = 18 m ³ /h |
| Comedor | | |
| 5 personas | 3 l/s x 5 = 15 l/s | = 54 m ³ /h |
| Total entrada de aire | | 144 m ³ /h |

Evacuación a través de zonas húmedas

| | | |
|----------------------|----------------------------------|---------------------------|
| Cocina | 6m ² x 2 l/s = 12 l/s | = 43,2 m ³ /h |
| Cocina de gas | 8 l/s | = 28,8 m ³ /h |
| Baños | 2 x 15 l/s = 30 l/s | = 108,0 m ³ /h |
| Total salida de aire | | 180,0 m ³ /h |

En este caso tomaríamos como **necesidades de la vivienda los 180 m³/h** que serían captados a través de las habitaciones y el comedor.

Superarían con creces las necesidades para estas últimas estancias.

Condiciones Generales de Venta

de todos nuestros productos

Devoluciones

Cualquier devolución de material requiere nuestra previa aceptación, no admitiéndola por causas no imputables a NOVATUB S.L.

En caso de aceptar una devolución, previa aceptación por escrito de nuestra Dirección, ésta se hará con las siguientes condiciones:

- Que el cliente entregue un albarán de devolución.
- Que sea material de stock habitual.
- Envío a portes pagados.
- Envases y productos completos y sin deterioros.
- Se efectuará el abono según el valor de la factura correspondiente, deduciendo los gastos de recepción, verificación, reenvasado (si fuera necesario), puesta en nuestro almacén, acondicionamiento y gastos de portes del envío inicial.

Todo ello representa una depreciación de un 30% del valor de la mercancía.

Reserva de dominio

La mercancía será propiedad de NOVATUB S.L. hasta su pago por parte del cliente, estableciéndose una reserva de dominio a favor de NOVATUB S.L.

Responsabilidades

Nuestra responsabilidad se limita a reparar o sustituir desde nuestro almacén únicamente los productos que presenten defectos de fabricación.

Los gastos de instalación corren a cargo del cliente.

Los productos que a nuestro juicio hayan sido utilizados inadecuadamente, manipulados o instalados incorrectamente, o que hayan sufrido daños durante el transporte o almacenamiento, quedan excluidos de nuestra responsabilidad.

Es responsabilidad exclusiva del cliente procurar las medidas de seguridad y la correcta instalación de nuestros productos, de acuerdo a las indicaciones descritas en nuestra documentación.

No es nuestra responsabilidad los daños a personas, equipos o instalaciones debido a un mal uso o instalación de nuestros productos.

Jurisdicción

La aceptación de la mercancía supone la conformidad con nuestras Condiciones Generales de Venta.

En caso de surgir desacuerdo entre el cliente y NOVATUB S.L., ambas partes se obligan a someterse a la competencia de los Jueces y Tribunales de Sabadell.

Este catálogo es propiedad de NOVATUB S.L.

Cualquier reproducción total o parcial está totalmente prohibido, salvo autorización por escrito de nuestra Dirección.

Los pedidos cursados a NOVATUB S.L. suponen la aceptación de las condiciones reflejadas a continuación.

En el supuesto de que existan condiciones de compra por parte del cliente que difieran de las nuestras, éstas deberán ser aceptadas por escrito por nuestra Dirección.

En caso de discrepancia, prevalecerán nuestras *Condiciones Generales de Venta*.

NOVATUB S.L. se reserva el derecho de modificar las especificaciones y / o el diseño de los productos de este catálogo sin previo aviso.

Precios

Son los que figuran en nuestra tarifa vigente en el momento de aceptar el pedido. Los precios de venta pueden modificarse en cualquier momento, en cuyo caso será notificado con la mayor antelación posible.

Los precios de la tarifa no incluyen el IVA ni otro gravamen preceptivo, y que repercutirán en la correspondiente factura.

Pedidos

Aunque se pueden avanzar por teléfono, es necesario la confirmación escrita, enviada por correo, fax o e-mail.

En el supuesto de que se hayan pactado previamente precios, descuentos o condiciones especiales, éstas deberán constar en el pedido.

En caso de anulación o modificación, el cliente acepta el cargo de los gastos ocasionados hasta la fecha.

Pedidos piezas especiales o fuera de stock

Deben ir acompañados de un plano o dibujo de la pieza, con las medidas y especificaciones de las bocas.

Seguidamente el cliente recibirá de NOVATUB S.L. la correspondiente oferta y plazo de entrega, y que si es de su interés, debe ser devuelta debidamente aceptada.

No se admiten devoluciones ni anulaciones de estos materiales.

Plazos de entrega

Salvo acuerdo expreso con el cliente, los plazos indicados son a título orientativo. El retraso en la entrega no podrá dar lugar a ningún tipo de penalización.

Expediciones

Tanto en envíos con portes debidos o pagados, nuestros productos viajan siempre por cuenta y riesgo del cliente.

Si se observan daños o anomalías en la recepción del material, deberán hacerse constar las mismas en el albarán del transportista y realizar una reclamación inmediata, para que, si procede, podamos reponer el material dañado con cargo al seguro de la agencia de transportes.

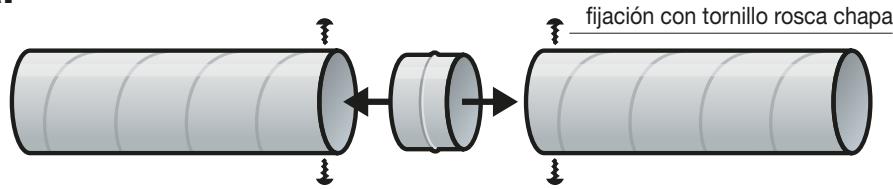

Para poder atender cualquier reclamación, el cliente deberá enviar a NOVATUB S.L. en un plazo no superior a 24 horas, una copia del albarán del transportista, y donde se habrá detallado la incidencia.

■ conducto oval

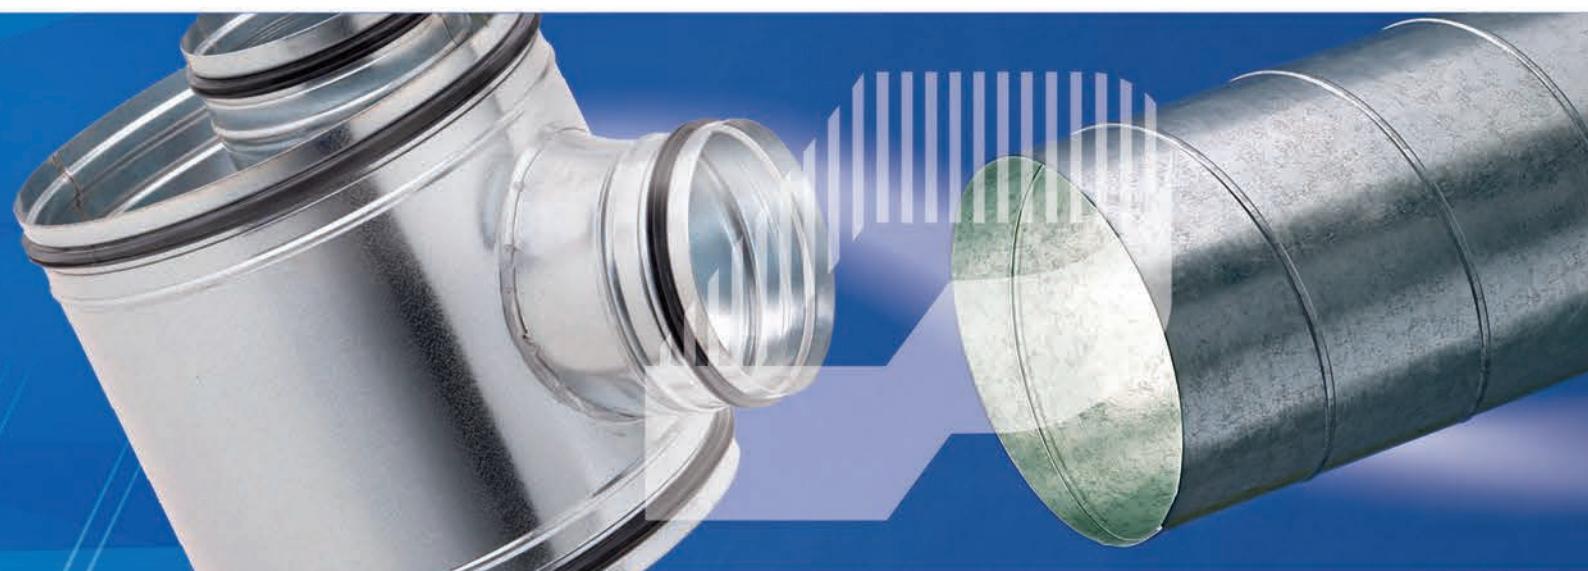

conducto circular

El conducto circular es la solución que se aplica en la mayoría de instalaciones de ventilación, extracción de humos, climatización y calefacción.

Además del **tubo helicoidal** y toda su amplia línea de accesorios, completan nuestra gama de geometría circular el **tubo helicoidal autoconectable**, el **tubo Shunt**, el **tubo liso**, el **conducto con pestaña** y los **conductos de doble tubo aislados, con y sin adaptador**. Los artículos de **tubería flexible** están en capítulo aparte. Las chimeneas modulares de doble pared en acero inoxidable disponen de su propio catálogo.

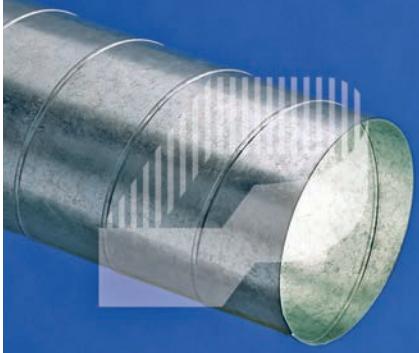

Una propiedad de nuestro conducto circular es la perfecta combinación y ensamblaje con los otros dos tipos de fabricados, -**el rectangular y el oval**-, facilitando así la solución más adecuada a cualquier instalación.

La amplia gama de **accesorios con junta de goma** completa el capítulo del conducto circular. El doble canal de goma encastada en los extremos de los accesorios proporciona una **estanqueidad total** a las conducciones.

tubo helicoidal

► pág. 16

Por sus características, el **tubo helicoidal** es la conducción más idónea para infinidad de aplicaciones.

Nuestra línea estándar de **acero galvanizado** abarca una amplia gama de diámetros -desde 80 mm hasta 2.250 mm- y en **espesores** que van **de 0,5 a 2,5 mm**, fabricándolo tipo reforzado ligero en diámetros superiores a 300 mm.

En **acero inoxidable** se fabrica con las mismas características en diámetros de 100 a 1.500 mm y en **espesores de 0,5, 0,6 y 0,7 mm**.

La **serie de GRAN DIÁMETRO** se corresponde con diámetros de 1.500 hasta 2.250 mm y exclusivamente en **espesores de 1 a 2,5 mm**.

La longitud estándar es de 3 y 5 metros, y a medida sobre pedido.

Complementamos nuestro programa de fabricación con el amplio surtido de **accesorios estándar** y **accesorios con junta de goma**, para cualquier tipo de nuestros conductos, tanto en **acero galvanizado** como **inoxidable**.

Las uniones entre tubos y accesorios se realizan directamente en todos los casos, no siendo necesario ningún elemento especial para la unión.

tubo helicoidal corrugado autoconectable

► pág. 17

Gane rapidez y elimine piezas

Combinando tecnología, experiencia y capacidad técnica, ofrecemos la variante del tubo helicoidal autoconectable .

Con este nuevo sistema de anclaje se mejora ostensiblemente el rendimiento. Las instalaciones resultan mucho más rápidas, ligeras y rentables, al anularse accesorios y reducir los tiempos de montaje.

Disponible en **espesores de 0,5, 0,6, y 0,7 mm**, y desde diámetro 100 hasta 630 mm.

conducto doble tubo aislado

► pág. 92

Conducto doble tubo aislado

Disponemos de una variada gama de diámetros en conductos de doble tubo aislados, con las dos paredes en **acero galvanizado**, en **inoxidable** o **combinadas**. Los accesorios correspondientes completan la oferta.

Conducto doble tubo aislado con adaptador incorporado El sistema más rápido !

Este tipo de conducto, incorporando los adaptadores ya montados, facilita y reduce los tiempos en cualquier instalación, al montar con mayor facilidad, rapidez y también seguridad.

tubería Shunt

► pág. 100

La **tubería Shunt** es el mejor sistema de evacuación de humos en viviendas colectivas, combinando a la perfección con el **tubo helicoidal corrugado autoconecitable** o con los **accesorios estancos con junta de goma**.

Dos conductos acoplados, el uno inscrito en el otro, garantizan unas condiciones óptimas de ventilación y salubridad.

Un sistema fácil y rápido de montar y que cumple a la perfección la normativa vigente del **Código Técnico de Edificación**.

tubo liso autoconecitable

► pág. 106

Ampliando la oferta de conductos circulares, disponemos de una amplia gama de **tubos lisos** con el sistema de **anclaje autoconecitable**.

La serie en **galvanizado**, con espesores de **0,6, 0,8 y 1,0 mm**, está disponible en diámetros de 100 a 1.000 mm, y se suministra en tramos de 500 y 1.000 mm.

En **acero inoxidable**, el espesor es de **0,5 mm**, y los diámetros disponibles de 100 a 560 mm, suministrándose también en tramos de 500 y 1.000 mm.

Cualquier otra medida no estándar la cumplimentaremos a través de nuestro departamento técnico.

conducto liso con pestaña de 5 mm

► pág. 108

Completando nuestra oferta de conductos circulares, disponemos de:

- Serie **tubos lisos con pestaña de 5 mm** y sus correspondientes **accesorios**.

Diámetros de 80 a 600 mm, con espesor de 0,6 mm y se suministra en tramos de 1.000 y 2.000 mm.

Cualquier otra medida no estándar se gestiona a través de nuestro departamento técnico.

- **tubería flexible**
► pág. 126
- **material difusor**
► pág. 130
- **piezas especiales**
► pág. 142

Complementando nuestro programa de conductos circulares, disponemos de la serie de **tuberías flexibles** -aluminio- y -PVC y poliuretano con refuerzo espiral de acero-.

Una amplia gama de **material difusor**, -plenums, rejillas, difusores, bocas extracción, ...- completan las soluciones en ventilación y aireación.

Asimismo, podemos desarrollar las más diversas demandas en cualquier tipo de proyecto, fabricando las **piezas especiales** más variadas.

accesorios para conducto circular

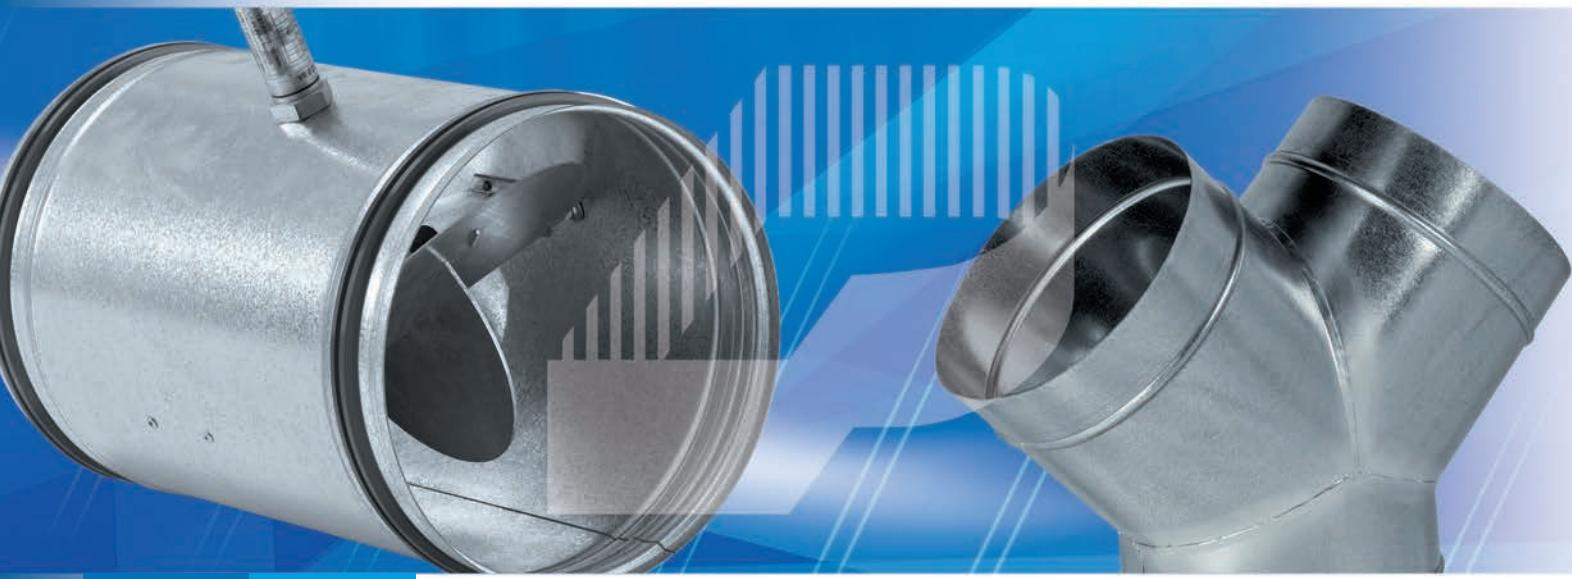

O O
accesorios circular

La amplia gama de **accesorios para el conducto circular** - modelos y diámetros- complementan y combinan a la perfección ensamblando todas nuestras líneas de tubos circulares.

Cualquier requerimiento de pieza, medida o material fuera del estándar será debidamente atendido por el departamento técnico.

La serie de **accesorios con junta de goma** completa el capítulo del conducto circular. Se suministran con la junta ya montada, lo que facilita una instalación rápida y fácil.

El doble canal de goma encastada en los extremos de los accesorios encaja perfectamente con el interior del tubo helicoidal, garantizando una **estanqueidad total** a las conducciones sin necesitar un posterior sellado, según la norma DIN EN 12237 clase D.

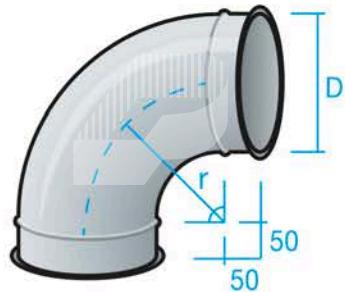

La **junta de goma** tiene un perfil especial de caucho EPDM homogéneo, fijado firmemente en un pliegue del tubo. Resiste temperaturas de -30 a +100°C y presiones desde 3.000 Pa positivas hasta 5.000 Pa negativas.

Soporte lazo techo con tensor

 Ø cable 2 mm

| Longitud cable | código |
|----------------|--------|
|----------------|--------|

| | |
|----------|-----|
| 2 metros | 204 |
| 5 metros | 205 |

Sistema de suspensión con cable.

La nueva forma y la más rápida de suspender cargas estáticas.

Resistencia:
50 kg cada 3 metros.

Caja ergonómica de zamac, que minimiza la corrosión.

Palancas de ajuste externo para facilitar la nivelación.

Muelles de acero inoxidable. Muelles de acero sinterizado.

Escuadras de:

- 300x200 a 500x400 mm,
▶ con 2 agujeros
- 600x500 a 800x600 mm,
▶ con 3 agujeros
- 900x700 a 1.500x900 mm,
▶ con 4 agujeros

Escuadra de apoyo para conducto circular

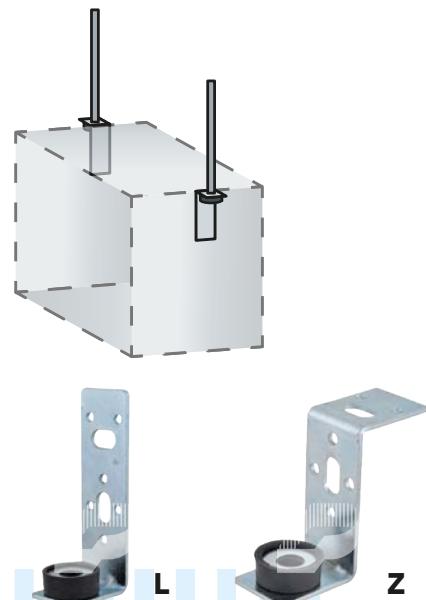

Para la fijación de conductos circulares de aire.
Aislante de ruido conforme DINA 4109.

- Acero cincado y taca de goma TPE negro.
- Orificios de Ø 4,8 mm para conexión con tornillos autoroscantes.

| Tipo | código | piezas caja |
|------|--------|-------------|
| V | 4401V | 50 |
| A | 4401A | 50 |

Escuadra de apoyo para conducto rectangular

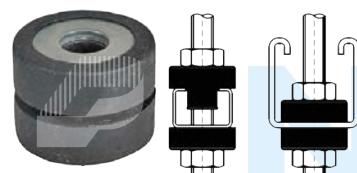

Para la fijación de conductos rectangulares de aire.
Aislante de ruido conforme DINA 4109.

- Acero cincado y taca de goma TPE negro.
- Orificios de Ø 4,5 mm para conexión con tornillos autotaladrantes de hasta 4,2 mm.

| Tipo | código | piezas caja |
|------|--------|-------------|
| L | 4401L | 50 |
| Z | 4401Z | 50 |

Amortiguador de ruido

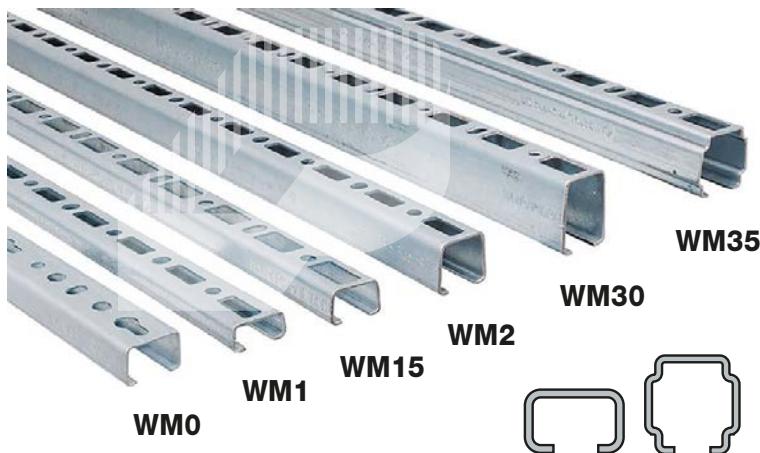

Goma aislante de ruido fabricada con TPE.

Amortiguador aislante de ruido conforme DINA 4109.

Reducción de hasta 16 db(A) de media, combinando con RapidRail WMO.
Amortiguador perfectamente válido para carriles RapidStrut y RapiRail.

| código | piezas caja |
|--------|-------------|
| 440011 | 50 |

Carril de fijación Rapid-Rail

Perfil en C.

WM15, WM30 y WM35 pueden usarse por ambos lados del carril y de manera muy rápida, gracias al patrón de colisos.

La distancia entre el extremo final del carril y el primer coliso es siempre la misma.

Escala métrica grafiada en lateral.

Acero 1.0242 pregalvanizado, resistencia 240 kg/m².

| L mm | grosor mm | tipo carril | código | piezas caja |

Soporte soldado

Placa pared soldada en perfil de apoyo, con soldadura al CO₂.

Carril con bordes inferiores dentados para mayor agarre.

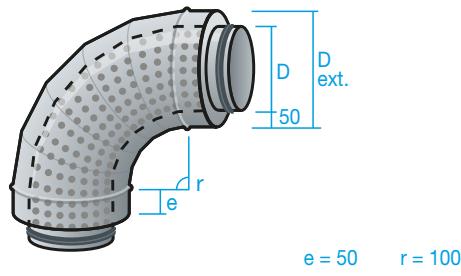

Colisos de la pletina a 90° que facilitan la fijacion.

Acero BUP 1000.

NOVATUB®

Silenciador rectangular

Ejemplo de silenciador de 1.000 x 300 mm (cotas A x B)

Silenciadores con **velocidad de salida de aire** inferior a 15 m/seg.

Para velocidades superiores, precisa recubrimiento de chapa perforada galvanizada, e incrementa un 60% el precio.

* Opción con motor incluido

Construcción compacta en acero galvanizado, soldada con láser y juntas de conexión de goma en los extremos, con hermeticidad según norma DIN EN 12237 clase D.

Eje de conexión interfaz disco atornillado libre de mantenimiento.

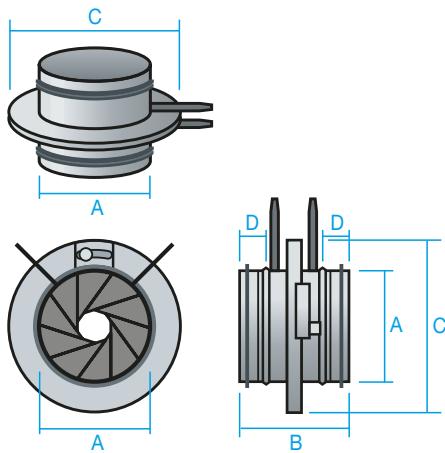

Temperatura de funcionamiento de -15°C a +100°C.

Larga durabilidad y sin necesidad de mantenimiento.

Montaje directo a tubo.

Compuerta de regulación circular Iris, manual

Los Reguladores con diafragma tipo IRIS están especialmente concebidos para medir y regular los flujos de aire en los conductos circulares de ventilación y climatización.

El cuerpo y la membrana-diafragma son de acero galvanizado.

Tuerca de ajuste con llave de plástico.

Puntos de medición de presión, con manómetro, a ambos lados del regulador.

Indicador gráfico, según las diferentes posiciones de apertura, del flujo de aire y niveles de presión.

Juntas de estanqueidad para conexión estanca con el conducto.

Compuerta de regulación rectangular, manual

Con aletas aerodinámicas, para instalaciones de ventilación y climatización de conductos rectangulares, con mando manual.

Dos anchuras de lamas: 100 y 165 mm.

Marco tipo "U" y placa de mando en acero galvanizado. Lamas de forma aerodinámica.

Accionamiento cómodo y fiable mediante cojinetes y contracojinetes de nylon.

Conexión directa a conducto rectangular.

Palanca no incluida. Precio, 8 €.

Regulador circular de caudal constante, junta de goma

Regulador circular de caudal constante para equilibrar instalaciones de ventilación y climatización.

Las compuertas mantienen el caudal constante en variaciones de presión, ocasionadas por causas varias, como conexiones o desconexiones en la instalación, obturaciones de filtros o conductos, etc.

Compuertas circulares automáticas, sin fuente de energía externa.

Flujo preestablecido de fábrica, ajustable mediante mecanismo exterior de alta precisión.

Construcción compacta en acero galvanizado, soldada con láser y juntas de conexión de goma en los extremos, con hermeticidad según norma DIN 24194cl 4.

Presión diferencial de 50 Pa a 1.000 Pa y flujo de aire de 03:01.

Temperatura de funcionamiento de -30°C a +100°C.

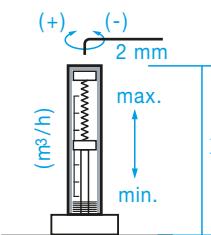

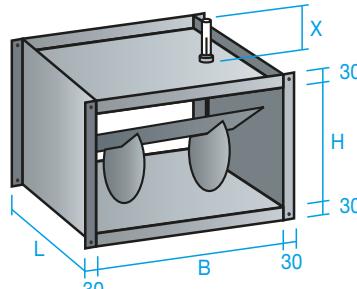

Larga durabilidad y sin necesidad de mantenimiento.

Montaje directo a tubo.

Regulador rectangular de caudal constante

reguladores

Dispositivo de ajuste caudal

Regulador rectangular de caudal constante, para equilibrar instalaciones de ventilación y climatización.

Las compuertas mantienen el caudal constante en variaciones de presión, ocasionadas por causas varias, como conexiones o desconexiones en la instalación, obturaciones de filtros o conductos, etc.

Compuertas automáticas, sin fuente de energía externa.

Flujo preestablecido de fábrica, ajustable manualmente mediante mecanismo exterior de alta precisión.

Construcción compacta en acero galvanizado, soldada con láser.

Presión diferencial de 50 Pa a 1.000 Pa y flujo de aire de 03:01.

Temperatura de funcionamiento de -30°C a +100°C.

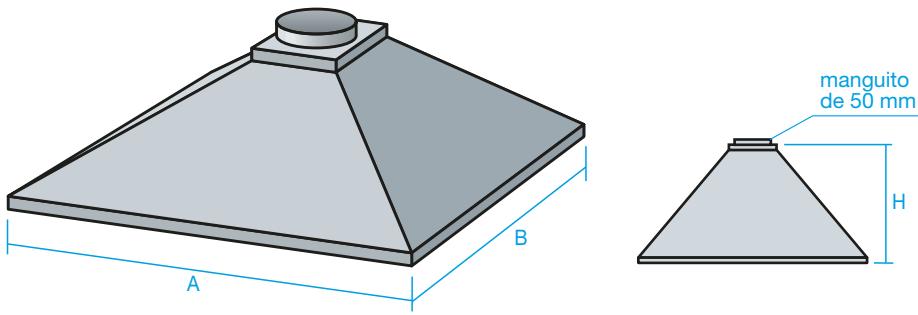

Larga durabilidad y sin necesidad de mantenimiento.

Montaje directo en conducto.

Caja portafiltros circular, sin filtro incorporado, longitud 500 mm

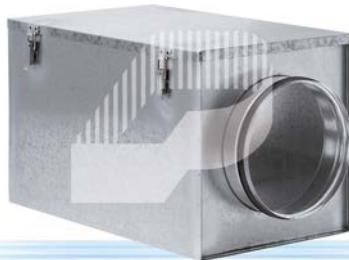

Caja portafiltros con entrada y salida circular, **sin filtro incorporado**, con junta de goma estanca.

Conexión directa a tubo.

En acero galvanizado, con tapa de fácil abertura para acceder y efectuar un rápido cambio de filtro.

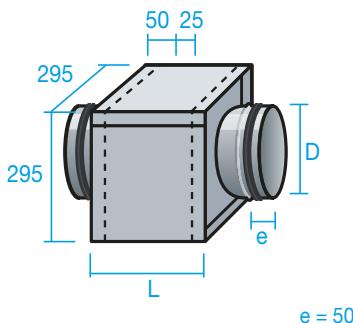

Se utilizan con **filtros de bolsas blandas** de alta eficacia **M 6**.

Filtros y prefiltros para unidades de tratamiento de aire, climatizadores, RCCF TCP, aportaciones y extracciones de aire

Filtro G 4 - 50

Manta filtrante sintética.
Perfil exterior acero galvanizado.
Eficacia EN 779: G4.
Eficacia gravimétrica EN 779: 90 %.
Pérdida de carga final: 250 Pa.
Capacidad de acumulación de polvo: 366 gr/m².
Clasificación al fuego: F1-K1
(DIN 53438)
M1 (NF F-16-101-2:1998,
NF P 92-507:2004).
Temperatura máxima de trabajo:
100°C.

Aplicaciones

Prefiltro para retener partículas de polvo gruesas en unidades de aire acondicionado y tratamientos de aire.

| Dimensiones mm | 526 código |
|----------------|------------|
| 287 x 287 x 48 | 526287287 |

| 592 x 592 x 48 | 12 | 3.800 |

Filtros compact F 7 - 48 disponibles F8 y F9

Manta filtrante de fibra de vidrio.
Perfil exterior acero galvanizado.
Eficacia EN 779:
M5, M6, F7, F8 y F9.
Eficacia gravimétrica: F7 = 80 %
F8 = 90 %
F9 = 950 %
Pérdida de carga final: 450 Pa.
Capacidad de acumulación de polvo: 366 gr/m².
Temperatura máxima de trabajo:
100°C.

Aplicaciones

Filtración de las partículas contaminantes de polvo fino en unidades de aire acondicionado y centrales de tratamiento de aire.

| Dimensiones mm | 527 código |

Filtros de bolsas M 6 disponibles F7, F8 y F9

Manta filtrante sintética.
Perfil exterior acero galvanizado.
Eficacia EN 779: M6
Eficacia opacimétrica EN779 2012: 60 %
Pérdida de carga final: 450 Pa.
Clasificación al fuego: F1-K1
(DIN 53438)
M1 (NF F-16-101-2:1998,
NF P 92-507:2004).
Temperatura máxima de trabajo:
100°C.

Aplicaciones

Filtración de las partículas contaminantes de polvo fino en unidades de aire acondicionado y centrales de tratamiento de aire.

| Dimensiones mm | 528 código |

Filtro de carbón activo en grano 2 kg

Perfil exterior acero galvanizado.
Tipo filtrante: carbón mineral
bituminoso, en pellets de 4 mm.
Densidad aparente: 450 kg/m³.
Pérdida de carga final: 220 Pa.
Temperatura máxima de trabajo:
50°C.

Aplicaciones

Eliminación de olores en múltiples usos y situaciones.

NOVATUB®

conducto doble tubo aislado

El **doble tubo aislado helicoidal, con y sin adaptador incorporado**, lo fabricamos en 3 calidades: **galva-galva, inox-galva e inox-inox**.

El sistema más rápido de montaje es el del **adaptador incorporado**, lo que facilita y permite montar con mayor agilidad, facilidad y seguridad.

tubería Shunt

La **nueva tubería Shunt con tubo interior** para extracción de humos de cocina mejora ostensiblemente la ventilación de las campanas de cocina al mismo tiempo que cumple el **Código Técnico de la Edificación**, que establece que la ventilación de las cocinas debe ser independiente de la ventilación general.

Cada cocina debe disponer de una campana y conducto extractor individual, los cuales desembocan en el conducto colectivo o general, siempre por debajo del nivel de la vivienda siguiente.

Dos conductos acoplados, el uno inscrito en el otro, garantizan una perfecta extracción de humos en los edificios colectivos.

Mediante las **nuevas te y cruz Shunt**, el humo viciado de la cocina sale individualmente de cada una por el conducto secundario y éste desemboca en el principal o general.

A excepción de los tramos de conexión, los conductos generales deben ser verticales y de sección uniforme entre plantas, y asimismo estancos. Los conductos deben ser practicables para su registro y limpieza.

Esta Tubería Shunt de Novatub garantiza la perfecta extracción de humos a la par que facilita y simplifica el montaje.

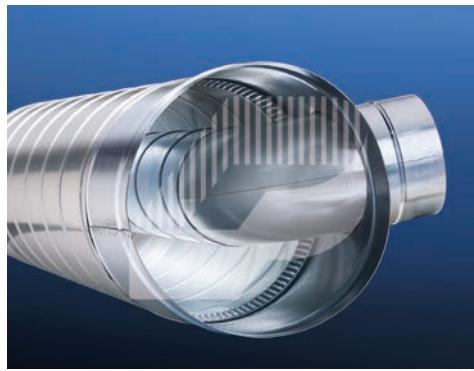

Se fabrica indistintamente en acero galvanizado o inoxidable.

La **tubería Shunt** combina a la perfección con el **tubo helicoidal corrugado autoconectable** o con los **accesorios estancos con junta de goma** de NOVATUB.

Se fabrican indistintamente en **acero galvanizado** o **inoxidable**.

Facilidad, rapidez y seguridad en el montaje:

- 1 - colocar el tubo interior
- 2 - colocar y acoplar la te
- 3 - montar el tubo exterior

conducto rectangular

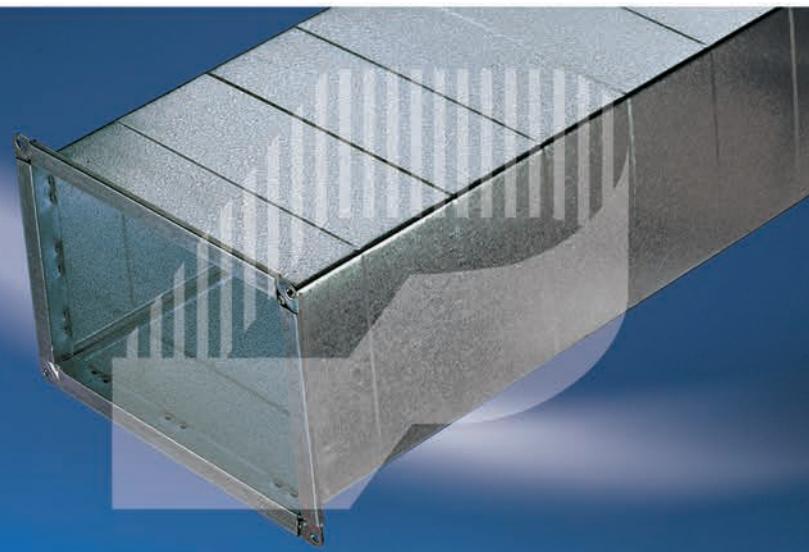

El **conducto rectangular** de NOVATUB ofrece la máxima fiabilidad y mejora ostensiblemente los sistemas de instalación más convencionales.

Su especial configuración nervada ofrece unas propiedades mucho más sólidas, obteniéndose así un conducto más ágil, más resistente y más estético.

Con el engatillado hermético se consigue un conducto completamente acabado, listo ya para el montaje en obra y totalmente a la medida del proyecto, eliminando acoplamientos y soldaduras.

Una amplia gama de accesorios y piezas especiales a medida, permiten satisfacer las mayores exigencias en cualquier tipo de instalación.

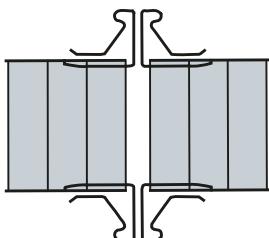

Todas las piezas de nuestro **conducto rectangular** son compatibles y se ensamblan perfectamente con nuestros conductos **circular** y **oval**, permitiendo así disponer de la solución más adecuada a cada proyecto.

Acoplamiento - Tolva

Acoplamientos

| | código |
|------------------------|--------|
| Oval → Circular | 171 |
| Oval → Rectangular | 172 |
| * Fabricación a medida | |

Tolvas

| | código |
|------------------------|--------|
| Tolva | 199 |
| * Fabricación a medida | |

Reducción

| | código |
|-----------|--------|
| Reducción | 150 |

El precio de las REDUCCIONES se obtiene multiplicando por 2 el conducto correspondiente a la medida superior.

Ejemplo:

Reducción de 560 x 400 a 100 x 300 mm:

- ▶ Conducto de 560 x 400 = 28,18 €
 - ▶ 28,18 € x 2 = 56,36 €
- Precio reducción: 56,36 €**

Aislamiento térmico adhesivo interior o exterior

espuma de polietileno autoextinguible

| 400 | 2200400 | 5 | 1 |
| 450 | 2200450 | 5 | 1 |

Soporta temperaturas hasta 300°.

Conductividad térmica a 25° = 210 W / m°C.

Total flexibilidad y gran ligereza.

Se suministra comprimido.

Relación extensible: 20 cm = 1 metro.

Aplicaciones

Aspiraciones de humo y gases domésticos e industriales.

Ventilación en general.

Tubo superflexible aluminio ALUFLEX

Tubo superflexible con armadura helicoidal de acero y dos capas de aluminio.

Total flexibilidad y muy ligero.

Supercomprimible.

Soporta temperaturas entre -20° y +110°.

Aplicaciones

Ventilaciones, aspiraciones, aire acondicionado y calefacción.

Tubo superflexible aluminio ALUFLEX aislado

Conducto superflexible de aluminio y poliéster con aislante térmico de fibra de vidrio de 25 mm.

Total flexibilidad y gran resistencia térmica.

Supercomprimible.

Barrera de vapor con complejo de aluminio reforzado.

Soporta temperaturas entre -20° y +110°.

Aplicaciones

Idóneo para instalaciones de climatización y ventilación.

Tubo superflexible aluminio ALUFLEX acústico

Superflexible de aluminio y poliéster, refuerzo interior alambre de acero e aislamiento fibra de vidrio 25mm

Especial para aislamiento acústico.

Total flexibilidad y gran resistencia térmica.

Supercomprimible.

Óptimo como barrera de vapor, evita condensación.

Soporta temperaturas entre -20° y +120°.

Aplicaciones

Idóneo en instalaciones de climatización y ventilación.

Tubo superflexible aluminio COMBI con protección exterior

Tubo superflexible de aluminio y poliéster con capa exterior de PVC de color negro.

Total flexibilidad y muy ligero.

Supercomprimible.

Soporta temperaturas entre -20° y +110°.

Aplicaciones

Idóneo para instalaciones de ventilación, aspiración, aire acondicionado y calefacción.

Tubo flexible EXTRAFLEX

Tubería de PVC plastificado con cubierta de protección en PVC autoextinguible, reforzada con espiral de alambre cincado.

Para aspiración de humos y sistemas de ventilación.
Total flexibilidad y gran ligereza.

Resistencia a los humos y a los gases.

Resistencia al fuego M2.

Buena resistencia química, asociada a las propiedades habituales del PVC.

Soporta temperaturas entre -15°C y +60°C.

Aplicaciones

Instalaciones de aire acondicionado (civil y naval), ventilación, humos, vapores, polvo, gas, etc...

Tubo flexible PRENOFLEX

Tubería de elastóremo termoplástico reforzada con espiral de acero cincado.

Uso industrial.

Ignífugo según norma UL94 categoría HB.

Gran flexibilidad y gran ligereza.

Gran resiliencia por las propiedades del TPV.

Buena resistencia química, asociada a la tabla del TPV.
Excelente resistencia a la fatiga, ozono y humos industriales.

Soporta temperaturas entre -40°C y +135°C.

Aplicaciones

Aspiración de gases y humos calientes provenientes de soldaduras y motores.

Tubo flexible POLIFLEX

Tubería de poliuretano flexible y transparente, base poliéster y espiral interna de acero cincado. Antiestática.

Para aspiración de productos con abrasión baja.

Uso alimentario (normas CE 1935/2004 y UE 10/201).

Gran flexibilidad, resistencia a la abrasión, a humedad y microorganismos.

Buena resistencia química, asociada a la tabla de PU.

Soporta temperaturas entre -30°C y +80°C.

Aplicaciones

Aspiraciones abrasivas, gases de aceites, humos, virutas, vapores, etc... y productos alimentarios que requieran simulante E en condiciones OM2.

Tubo flexible AIRFLEX

Tubería con tejido de PVC reforzada con espiral de acero cincado. Para la extracción de aire y sistemas de ventilación.

Uso industrial.

Gran flexibilidad y gran ligereza.

Gran resiliencia por las propiedades del TPV.

Buena resistencia química, asociada a la tabla del PVC.

Soporta temperaturas entre -10°C y +60°C.

Aplicaciones

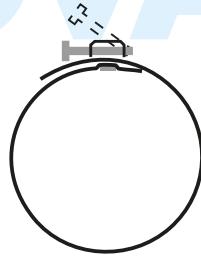

Sistemas de ventilación en secadoras y extractores de aire en caravanas.

material difusor

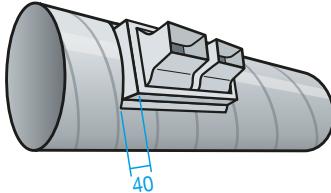

La gama de **plenums**, **rejillas**, **difusores**, **bocas de extracción**, ... completan nuestras soluciones para la ventilación y aireación de instalaciones domésticas e industriales.

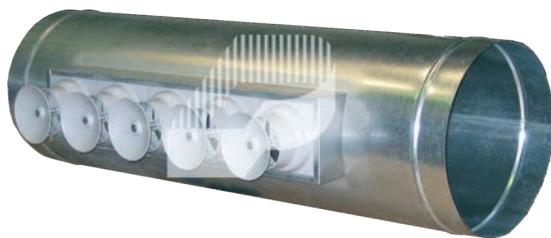

Marco de montaje para difusores TAD y BD

Marco de chapa galvanizada con guía incorporada, para acoplar los difusores a **conductos circulares**.

Diámetro del conducto, a definir.

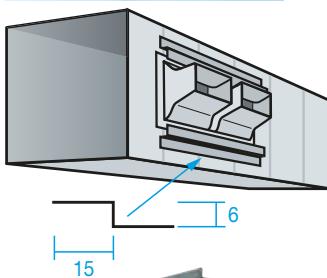

código

| | |
|-----------------------------|-----|
| De 1 a 10 toberas TAD o BD | 511 |
| De 11 a 20 toberas TAD o BD | 512 |

Guía de montaje para difusores TAD y BD

Guía de chapa galvanizada para montar grupos de difusores TAD y BD en **conductos rectangulares**.

código

| | |
|-------------------------|-----|
| Guía, unidad de 1 metro | 513 |
|-------------------------|-----|

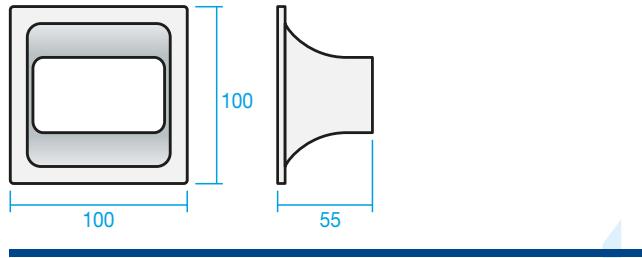

Difusor de alta inducción TAD recto

Difusor de aire de **alta inducción y bajo nivel acústico**, gracias a su forma aerodinámica y no utilizar álabes para cerrar el paso del aire.

Ideal para montar en conductos a la vista en grandes superficies.

código

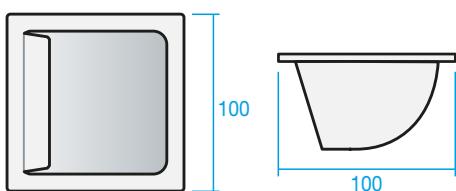

| | |
|-------------------------|-----|
| Difusor TAD 100 x 100 | 516 |
| Regulador TAD 100 x 100 | 517 |

Difusor de alta inducción TAD curvo

Difusor de aire de **alta inducción y bajo nivel acústico**, gracias a su forma aerodinámica y no utilizar álabes para cerrar el paso del aire.

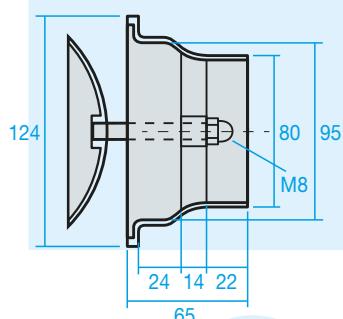

Ideal para montar en el techo, apto tanto para impulsión como para aspiración de aire.

código

| | |
|-------------------------------|-----|
| Difusor TAD curvo 100 x 100 | 518 |
| Regulador TAD curvo 100 x 100 | 519 |

Difusor de alta inducción BD

Difusor de aire de **alta inducción y bajo nivel acústico**, con regulación manual autorroscante.

El caudal de aire se regula mediante rotación del deflector, indistintamente por el interior o por el exterior.

®

código

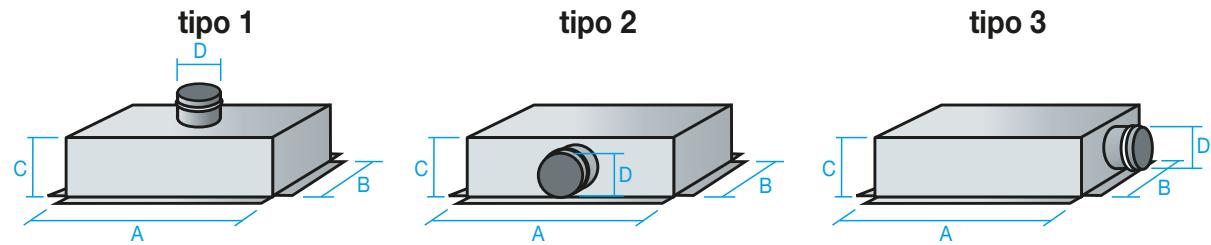

| | |
|-------------------------------------|-----|
| Difusor BD 124 x 124 | 514 |
| Deflector con tornillo para boca BD | 515 |

Estos difusores impulsan el aire a velocidades superiores a las habituales, aportando una mínima desviación del flujo en función de la temperatura.

Se montan configurándose filas de varias piezas y éstas filas pueden ser sencillas, dobles y triples.

Plenum conexión múltiple

Ejemplo de cómo saber el precio de un Plenum de conexión múltiple:

Plenum múltiple de 4 conexiones :

- ▶ 4 salidas de Ø 125 mm
- ▶ $A = 700 + B = 150 + C = 150 = 1000 \text{ mm}$
hasta 1000 mm de 4 conexiones = 80,24 €
- ▶ **Precio plenum : 80,24 €**

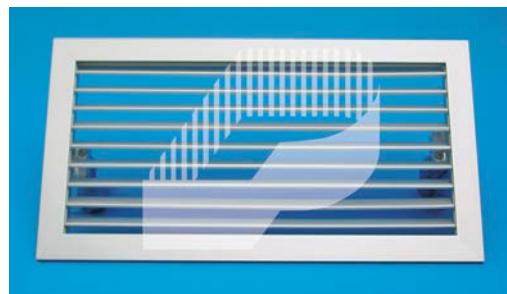

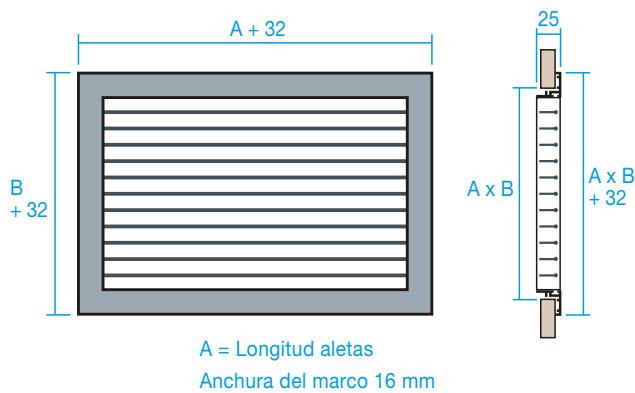

| | 2 conexiones | 3 conexiones | 4 conexiones | 5 conexiones |

ACABADOS

Estándar: Aluminio anodizado.

Opcional: Lacado Blanco RAL 9010, sin incremento del precio tarifa.

Para otros acabados, consultar.

MOTORIZACIÓN

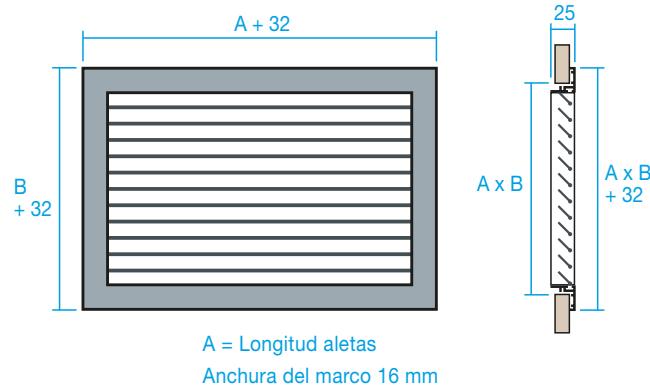

Posibilidad de motorizar la regulación de caudal con motor a 220 ó 24 V.

No es aconsejable motorizar regulaciones de longitud (A) > 800 o altura (B) >200.

Posibilidad de accionar la regulación mediante palanca E-P.

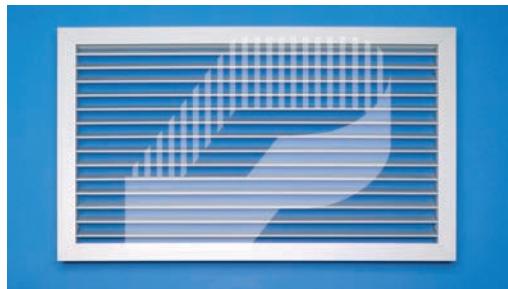

Rejilla de retorno de aletas fijas a 45°

Medidas al pedir rejilla:

La primera cifra corresponde a la longitud de las aletas (A) y la segunda a la altura de la rejilla (B).

Rejilla de retorno de **de aletas rectas horizontales fijas a 45°**.

Perfiles de aluminio extruido y anodizado.

Fijación por muelles y tornillos.

Medidas de hueco pared sin marco.

Si se coloca con marco, consultar medidas de hueco.

ACABADOS

Estándar:

Aluminio anodizado.

Opcional:

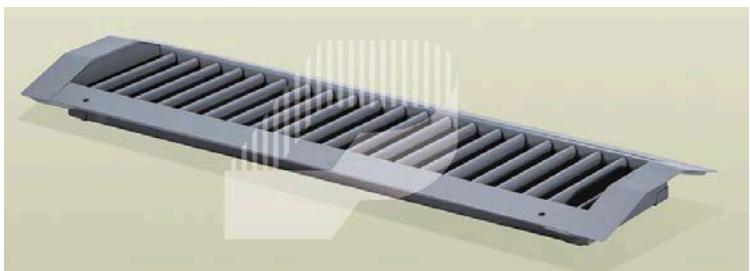

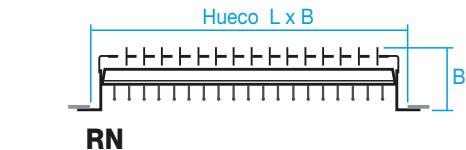

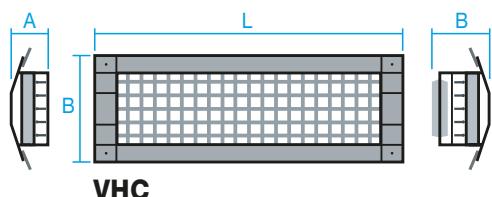

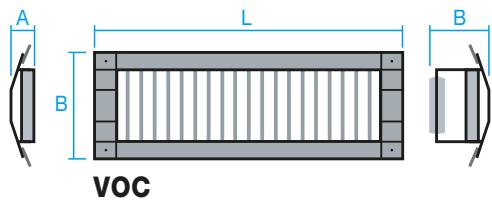

Lacado Blanco RAL 9010, sin incremento.

Otros acabados, consultar.

ACABADOS

Compuerta de regulación de caudal de aire, portafiltro o malla metálica.

Rejilla para tubo circular, lacada en color gris, de impulsión o retorno

VOC

Rejilla de **deflexión simple** para tubo circular, con aletas móviles verticales, en acero galvanizado.

VHC

Rejilla de **doble deflexión** para tubo circular, con aletas móviles, verticales delante y horizontales detrás, en acero galvanizado.

RN

Accesorio **compuerta de regulación**, recta, deslizante (extracción), en acero galvanizado.

Lacado en color Gris RAL 7001.

Difusor circular de cono fijo

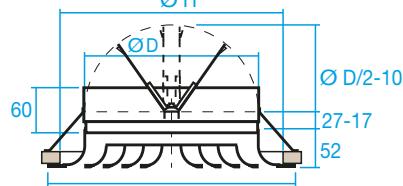

E-DR50

E-DR50+CR

E-DR50+CR+PM

E-DR50+XAPO

**E-DR50**

Difusor circular de **conos fijos** construido con aros de aluminio repulsados y anodizados. Los conos están separados por espacios de 50 mm.

E-DR50+CR

Difusor circular **con compuerta de regulación** de caudal tipo mariposa.

E-DR50+CR+PM

Difusor circular **con compuerta de regulación** y puente de montaje.

E-DR50+XAPO

Difusor circular **con cuello-puente especial con regulación** para adaptar directamente a tubo flexible.

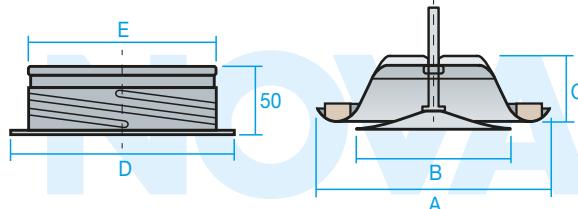

ACABADOS

Estándar: Aluminio anodizado.

Opcional: Lacado Blanco RAL 9010, sin incremento precio.

* Fabricación a medida

* Opción pintura colores RAL

piezas especiales galvanizado e inoxidable

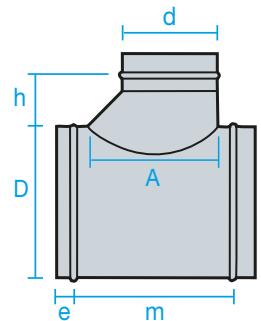

Nuestra experiencia y tecnología nos permiten desarrollar las más diversas demandas en cualquier tipo de proyecto, fabricando las **piezas especiales** más variadas, tanto para nuestros conductos circulares como para los rectangulares y oval.

Nuestro departamento técnico les atenderá tanto si son variaciones de los productos estándar como si se plantean nuevos desarrollos.

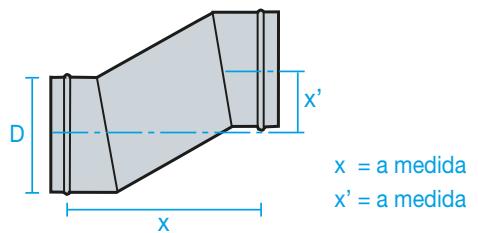

Ejemplos de piezas especiales más frecuentes

Te 90 ° reducida o cónica, con injerto excéntrico

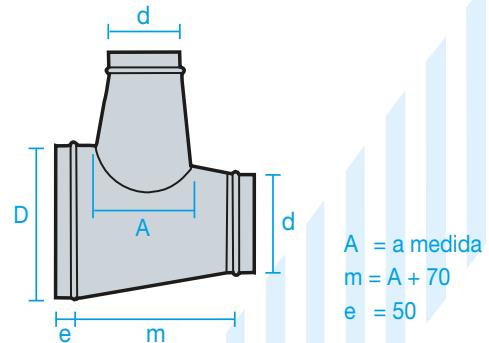

$$\begin{aligned}h &= d \\A &= 1,5 \cdot d \\m &= 1,5 \cdot d + 70 \\e &= 50\end{aligned}$$

Desviación

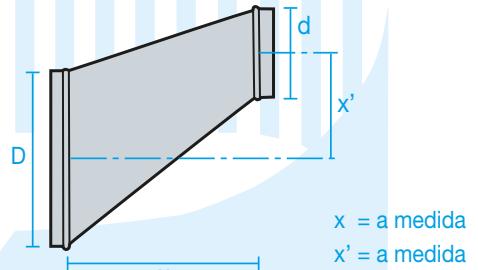

x = a medida
 x' = a medida

Te 90 ° reducida o cónica, con injerto cónico

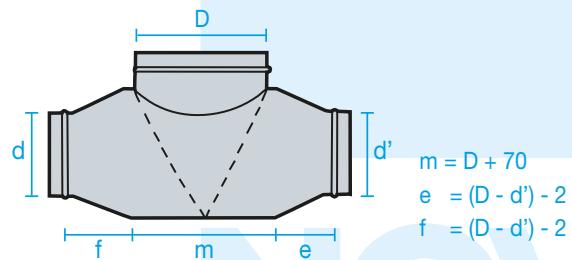

$$\begin{aligned}A &= \text{a medida} \\m &= A + 70 \\e &= 50\end{aligned}$$

Desviación cónica

x = a medida
 x' = a medida

Te 90 ° cónica, Ø diferentes

$$\begin{aligned}m &= D + 70 \\e &= (D - d') - 2 \\f &= (D - d') - 2\end{aligned}$$
